DETAILED ACTION

1. Applicant's election without traverse of Group III, claims 60-64 in the reply filed on 10/5/2007 is acknowledged.

2. Claims 1-59 and 65-68 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/5/2007.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 60-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant(s) regard as their invention.

5. Claim 60 is unclear from the specification how scoring the lesion with a scoring structure occurs. The claim has been rejected as best understood on the merits of the structural limitations.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 60-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Dror et al (5,102,402).

8. Dror et al disclose in figures 1 and 3, a method for delivering a drug to a vessel lesion, including: scoring the lesion with a scoring structure (it is noted that the scoring lesion occurs as the balloon is inflated which placed elements 16 directly against the other tissue of the vessel wall, thus it will create some sore of scoring the lesion) which carried by an expansible balloon 12, and releasing a drug into the scored lesion to enhance delivery into the vessel wall (see col. 2, lines 10-47). As to claims 61-64, Dror discloses the drug is carried by the balloon 12 as a platform, where the drug is present in capsules 16 or in a drug containing polymer (see col. 2, line 11).
